

Ngai, Aaron

Needfinding

1. Need to be able to make final project with better description.
2. Need to be able to make description clear and easy to read.
3. Need a way to implement instructions to certain parts of the site.
4. Need a way to visually maintain the friendly look.
5. Need to be able to make navigating the website to be easier and clear.
6. Need a way to maintain the interaction/community portion of the website.
7. Need to be able to do something similar to the collaboration portion of the site.
8. Need to be able to not lead signups to directions.
9. Need to be able to make interface a bit more interactive.
10. Need to really focus on a description for the website so there is an overall less confusion of the site and less fumbling around trying to figure out what to do on the home page instead of looking through comments which make no sense.
